DETAILED ACTION

This Office action in response to the amendment filed January 19, 2007 in which claims 1 and 20 were amended.

1. The prior art rejection is withdrawn in view of the amendment to the claims and Applicant's arguments.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-11, 13-15, 17, 18, 20-34, 36 and 39-45 and those claims dependent upon these claims are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rejected because the language "said coupling agent is a one" should read – said coupling agent is--. There is no antecedent support in the claim for "the Diels-Alder adducts". This claim language should be replaced with the – a di-acid of a Diels-Alder adduct of unsaturated fatty acids and a tri-acid of a Diels-Alder adduct of unsaturated fatty acids--.

Claim 9 is rejected because claim 8 has already set forth that the block copolymer is an ethylene oxide/propylene oxide copolymer. Furthermore, what constitutes an ethylene oxide block copolymer and a propylene oxide block copolymer. What is the second monomer for each oxide?

Claims 10 and 31 are rejected because "octyl phenoxyethoxyethanol" is not a block copolymer.

Claim 13 is rejected because there is no antecedent support in claim 1 for a "primary emulsifier". Also, "polymer" should read --copolymer--.

In claim 14, "diethanolamid" should read --diethanolamide--.

Claim 15 is rejected because claim 13 has already set forth that the block copolymer is an EO/PO block copolymer.

Claim 17 is rejected because claim 1 recites that the coupling agent is a salt of the adducts and not a di-acid of the adducts.

Claim 18 is rejected because claim 1 recites that the coupling agent is a salt of the adducts and not a tri-acid of the adducts.

Claim 20 should be amended as follows: "primary surfactant" should read -- a primary surfactant--; "block copolymer" should read --a block copolymer--; "is a one" should read --is --; "a di-acid of the Diels-Alder adducts of unsaturated fatty acids and a tri-acid of the Diels-Alder adducts of unsaturated fatty acids" should read -- a di-acid of a Diels-Alder adduct of unsaturated fatty acids and a tri-acid of a Diels-Alder adduct of unsaturated fatty acid --.

Claim 29 and 30 are rejected because in the absence of an additional monomer, it is not clear what constitutes an ethylene oxide block copolymer or a propylene oxide block copolymer.

Art Unit: 1714

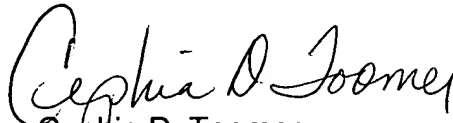

Claims 32-34 and 36 are rejected because claim 20 has already set forth that the copolymer acts as a surfactant stabilizer. Therefore, it is not clear how the recited compounds are also the surfactant stabilizer.
